

Pool Clarifier

DESCRIPTION

Pool Clarifier restores sparkling clear water by binding small particles into larger masses that can be easily removed by the filter. This product works while the filter is in operation, requires no premixing, contains no alum and does not affect the pH.

FEATURES

- Concentrated formula
- Contains specially formulated polymers
- Easy to use - no premixing
- Does not affect pH
- Benefits

BENEFITS

- Clears cloudy water quickly
- Helps reduce chlorine usage
- Makes water sparkle

DIRECTIONS FOR USE

Before applying this product ensure that the filter is operating efficiently. Apply Pool Clarifier weekly or whenever the pool water has lost sparkle.

Apply Pool Clarifier at the rate of 15ml per 10m³ by pouring gently around the perimeter of the pool. Leave pump and filter running for 8 hours after application. If pool clarity has not been restored after 36 hours, repeat the treatment.

Pool Clarifier

Highly concentrated product based on specially formulated polymers that quickly clears cloudy water.
